

DUSTMASTER RP 1236 POWERFUL DUST EXTRACTOR

DUSTMASTER RP 1236 POWERFUL DUST EXTRACTOR

The NEW RP 1236 is compact, but also big. Light, but particularly powerful. Just as uncompromising as it is adaptable; opposites come together in the new RP Series Extractor.

The compact dimensions and low weight of the new RP Series extractors will bring greater flexibility to the job.

Both the front swivel castors and rear wheels are made from a specially designed material for reduced wear, and the locking brake and precisely balanced, low centre of gravity ensure stability on any surface.

For an impressive display of just how big something small can be, take a look under the removable upper section of the new RP 1236, newly developed dust container and a pulse cleaned, space efficient flat filter which are specially optimised for use with concrete dust. Driven by a high-power turbine, these features mean the RP 1236 picks up significantly more dust, and provides consistently high suction, even over long periods of use.

Adding a CPS 24-50 SUPA SEPARATOR will enhance performance significantly and prolong its life. We recommend using the RP1236 with a CPS 24-50 with machines such as Meteor, Satellite 380 & 480 at all times.

The correct hose and hose cuffs must be used with RP1236 at all times

FOR HEAVY-DUTY INDUSTRIAL CLEANING AND DUST COLLECTION

- Complete with 3.5m hose
- Floor Tool Kit

FEATURES EFFECTIVE REVERSE PULSE FILTER CLEANING
